

COVID Epidemiology Situation Update

Tim Lant, PhD, MAS, Heather Ross PhD, DNP, ANP-BC, Anna Muldoon, MPH, Samantha Sokol, Esma Gel, PhD, and Megan Jehn, PhD

September 16, 2020

Summary

September 16, 2020				
	Statewide		Maricopa	
	Reported Today	Cumulative	Reported Today	Cumulative
Cases	695	209,907	281	138,151
PCR Tests	15,957	1,326,272	9,777	792,075
% Positive	4.4%	17.1%	2.9%	13.3%
Hospitalizations	25	21,825	8	14,333
Deaths	27	5,371	25	3,197

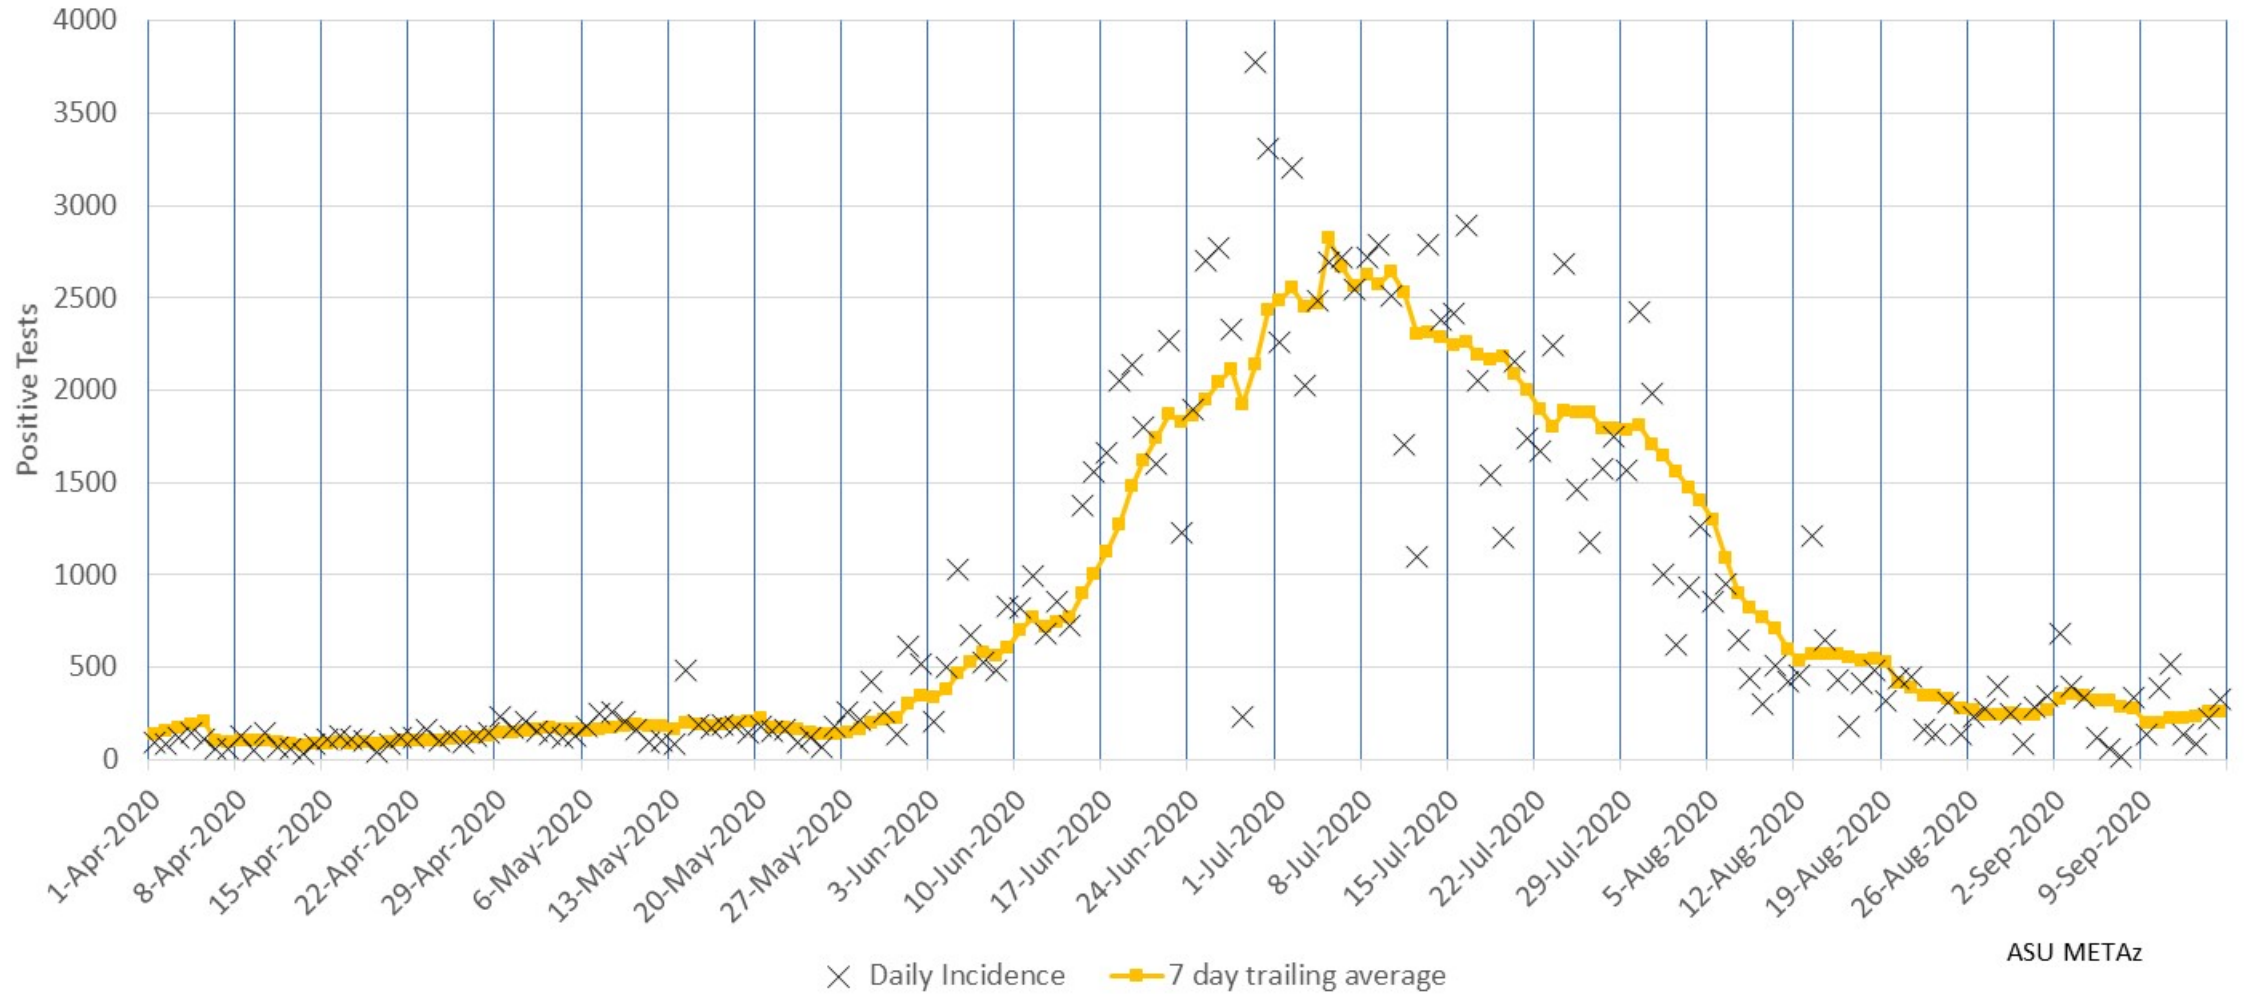

All data pulled from azdhs.gov. Numbers may not match Maricopa county data.

- Today's statewide case count (695), in line with counts last week. The 7-day trailing average has increased to 480. The epi curve continues to increase slowly.
- Percent positivity statewide and in Maricopa County remain low, as testing volume increases. Optimally, percent positivity will be less than 2% to fully characterize the extent of community spread and identify an outbreak; more testing is required in Maricopa County and statewide.
- Hospital fatality rates are slowly rising again in the setting of overall declining inpatient hospital utilization (similar volumes to mid April). Overall case fatality rates also continue to rise slowly.
- There is an uptick of COVID ED visits, which remain generally at levels similar to mid-June when wide community spread was underway.
