Deaths	18	5,650	20	3,392

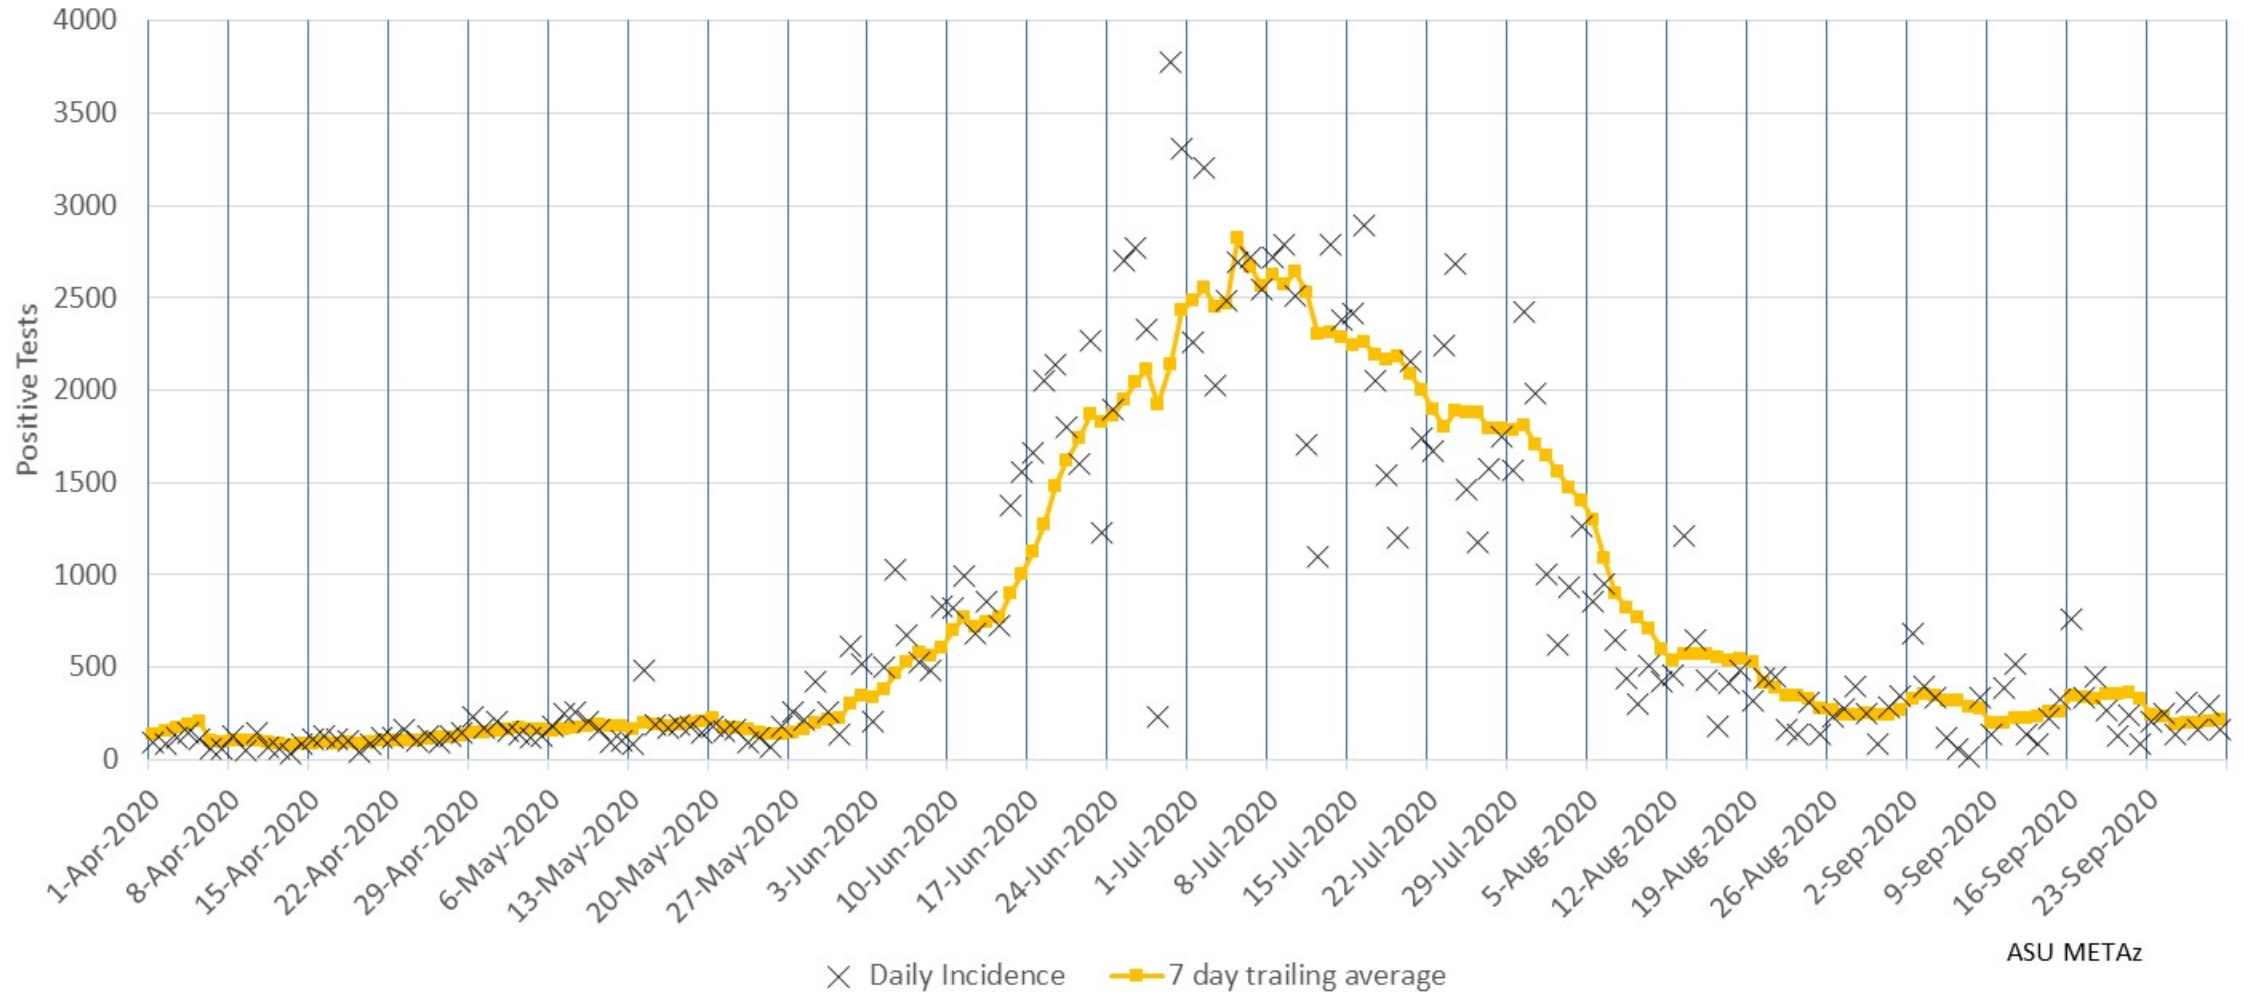

All data pulled from azdhs.gov. Numbers may not match Maricopa county data.

- Today's statewide case count is 323, with 118 cases (37%) in Maricopa County, lower than population distribution would suggest.
- The demonstrated epi curve has begun to show increases in Maricopa County and statewide, including a more pronounced upward inflection in the statewide epi curve.
- Percent positivity statewide is 8%, likely due to low testing volume. Maricopa county positivity is 6.4%, also with very low testing volumes. While these numbers are lower than yesterday, they are still higher than they have been in recent weeks.
- Hospital fatality rates statewide appear to be plateauing in the setting of reduced case hospitalization rates overall. Suspected under-reporting may be partially responsible for the changing trends.
- Statewide, ED visits and inpatient bed use for COVID-19 are slightly increased. There is no indication that hospital resources are at risk of becoming overwhelmed.
