

COVID Epidemiology Situation Update

Tim Lant, PhD, MAS, Heather Ross PhD, DNP, ANP-BC, Anna Muldoon, MPH, Samantha Sokol, Esma Gel, PhD, and Megan Jehn, PhD

November 30, 2020

Summary

November 30, 2020				
	Statewide		Maricopa	
	Reported Today	Cumulative	Reported Today	Cumulative
Cases	822	326,817	326	205,658
PCR Tests	17,364	2,253,689	11,774	1,327,451
% Positive	4.7%	14.5%	2.8%	11.4%
Hospitalizations	218	25,786	168	16,069
Deaths	5	6,639	5	3,982

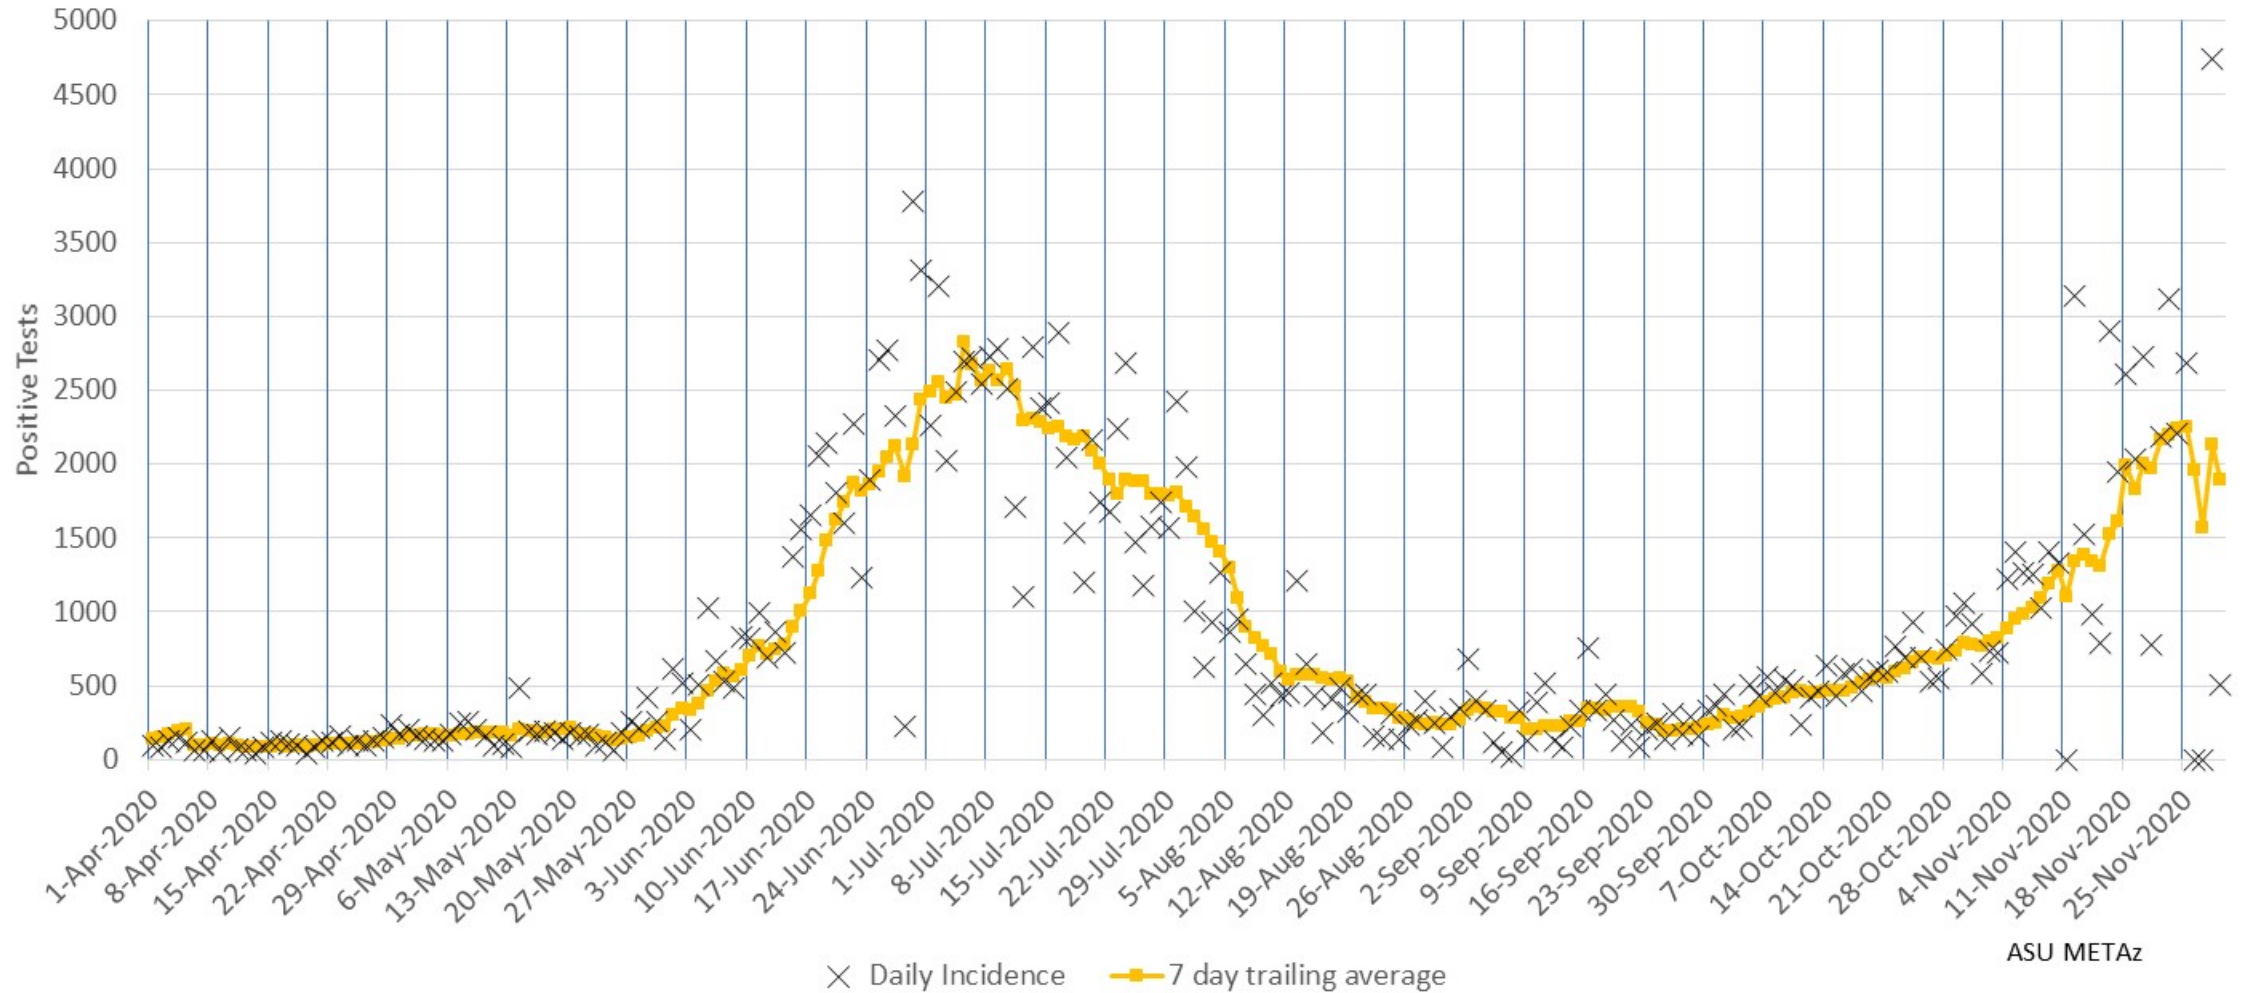

All data pulled from azdhs.gov. Numbers may not match Maricopa county data.

- Today's statewide case count is 822, with 326 cases (39.7%) in Maricopa County, lower than population distribution. Today's number is significantly lower than numbers over the weekend with obvious reporting delays. The 7-day average for reported cases is now 3,511.
- The epi curve continues to increase in Maricopa County and statewide with clear exponential growth.
- Percent positivity reported today is 4.7% statewide and 2.8% in Maricopa County. These numbers are also out-of-pattern, much lower than all recent numbers.
- Hospital utilization and ED visits continue to increase, with inpatient bed usage for COVID-19 at 29% of inpatient beds and 33% of ICU beds statewide. Current hospital utilization is 86% for inpatient beds and 89% for ICU beds including COVID and non-COVID utilization. Utilization patterns combined with case trajectories raise serious concerns that hospital resources are at imminent risk of becoming overwhelmed.
