Science, Technology, Engineering and Math

Science, Technology, Engineering and Mathematics (STEM) encompasses a wide variety of career paths, from forensic research, data analytics and cyber security to game design and aviation. The Office of Knowledge Enterprise Development provides students, faculty, staff and community members with an interest in STEM the ability to collaborate, test and design solutions for the world’s most complex challenges. Sun Devils in STEM create drones capable of being operated using the human brain, detect and treat neurodegenerative diseases and design new technology for space exploration.

Tips for Success

Participate in research
Research is the complement to your classroom experience at ASU. Because STEM careers rely heavily on research advancement, it is imperative that you gain research experience. Check out research projects.

Consider getting an advanced degree
In STEM careers, advanced degrees are a must. Research the position you aspire to and take a look at the requirements. If it requires a masters or PhD, start thinking about applying to relevant advanced degree programs.

Complete an internship
Many positions in STEM are highly competitive and completing an internship will allow you to practice the technical skills and theories you've learned in the classroom. Not only will internships allow you to practice technical skills, you will also gain teamwork and communication skills.

Highlight your technical skills
Organizations that hire in the STEM fields value technical skills and employees who can clearly articulate them on resumes and in interviews. If you have developed any new technologies, websites, apps or games, including these in a portfolio can help showcase your skills.

Possible Career Fields
- Aerospace
- Aviation
- Biological & Life Sciences
- Bioinformatics
- Cartography/GIS/Geology
- Computer Technology & Design
- Earth & Environmental Science
- Econometrics
- Engineering
- Genetics Counseling
- Human Factors, Psychology, & Cognitive Science
- Interdisciplinary Scientific & Technical Research
- Internet & New Media
- Mathematics & Statistics
- Management
- Meteorology
- Physical Science
- Solar Energy
- Telecommunications
Network with professors
Building relationships with professors that have similar research interests can help you when you go to apply for jobs. They can serve as references and can connect you with other researchers in your field.

Professional Associations
There are several local and national professional associations connected to this Career Interest Area. Joining a professional association will help you network with professionals already in your field of interest, as well as expose you to new opportunities you may not have considered. Some are free to join and others may offer student rates to become a member.

- American Mathematical Society
- American Chemical Society
- American Society for Microbiology
- American Society of Civil Engineers
- Association for Women in Science
- National Society of Black Engineers
- Society of Hispanic Professional Engineers
- Society of Manufacturing Engineers
- Society of Neuroscience

Next Steps
Try searching for internships on Handshake or volunteer opportunities with VolunteerMatch.

Student Organizations @ ASU
Student organizations are another great way to get connected with fellow students with similar interests. Many student clubs bring potential employers to speak at meetings, host career-related events, and offer professional development opportunities. Check Sun Devil Sync for more information on joining student organizations.

- AIGA Poly
- Air Devils
- American Institute of Aeronautics and Astronautics
- American Institute of Chemical Engineers
- Biomedical Engineering Society
- Department of Information Systems Club
- Human Factors and Ergonomics Society
- Math Club
- NASA Space Grant Robotics
- Software Developers Association
- The Biomedical Science and Genetics Club
- The Planetary Society at Arizona State University
- Women in Science and Engineering
