

Still Exploring

For individuals still exploring their Career Interest Area (CIA), resources are available to help guide the decision process. ASU Career and Professional Development Services provides students and alumni several opportunities to engage with professionals in a variety of fields through career fairs, on campus career panels and workshops, virtual networking opportunities and mentorship. These opportunities can assist individuals with narrowing down potential career interests. In addition to career events, students and alumni can meet with a career advisor to receive tailored guidance on potential careers. Using career assessments such as me3, Myers-Briggs Type Indicator (MBTI) and StrengthsQuest, career advisors can support students and alumni in exploring how their interests and strengths translate into a career interest area.

Tips for Success

Take ASU's me3

To see careers that might be right for you. Use your results to identify which career interest area the suggested careers fall into.

Explore your options

By meeting with a Career Advisor Your advisor will be able to assist in helping you determine the right career path and CIA you should pursue. Make an appointment through Handshake by going to eoss.asu.edu/cs/handshake.

Next Steps
